PROFESSIONAL SUMMARY

- Senior Technical Program Manager and PMP with 8 years in enterprise software, payments operations, and industrial R&D. At Meta, ran the program office for a global support operation and scaled an AI payment verification tool from pilot to enterprise. At O-I, took a first-of-its-kind R&D program from the lab into production.
- Runs several technical programs at once; sets scope, milestones, dependencies, and roadmaps, and holds delivery through RAID logs, phase gates, and Agile ceremonies.
- Partners with engineering, product, legal, compliance, risk, and operations; sends concise status and decision updates from the team level to the steering committee.
- Builds the program function itself, from intake standards and templates to reporting and PM onboarding, and automates the manual work around it.
- Hands-on in Jira, Confluence, Azure DevOps, SQL, Python, and AI automation tools; Agile, Scrum, and Waterfall.

EXPERIENCE

Senior Technical Program Manager, Global Scaled Operations | **Meta** | Contract

January 2025 - August 2026

Scope: 15+ markets | 14,000+ agents | 8 portfolios | 5 direct reports

- Cut average handling time from 19 minutes to 9 across 22 products by identifying an automation opportunity and taking the AI Payment Verification tool from business case to deployment.
- Unblocked launches in an APAC market by building the quoting and invoice verification features its government rules required before teams could transact on the business account platform.
- Standardized payment intake handling for advertisers by authoring dozens of scenario protocols and knowledge base articles with the payments and risk teams.
- Consolidated a 20-portfolio program office after a team reorg, carrying 8 portfolios directly and handing the other 12 to self-governance.
- Built the executive dashboard the director used to confirm status across every portfolio, and wrote 300 epics with the cost estimates finance, legal, and leadership needed before kickoff.
- Recovered 4 hours a day by building a dozen automations for message triage, ticket tagging, closure and filing, and owner notification.
- Built the PM onboarding program from scratch and coached direct reports to 40% higher output.

Senior Technical Program Manager, Technology Delivery | **O-I** | Full-time

April 2023 - November 2024

Scope: $250M R&D program | 200+ engineers | 3 global facilities | 19 countries

- Orchestrated delivery of the $250M glass melting R&D program from lab experimentation through two production site launches.
- Saved 8 hours a week per person across a 12-person IT team by replacing ad hoc ticket intake with a templated Azure DevOps standard that captured reporting before sprint kickoff.
- Coached 12 portfolio teams as Scrum Master and trained the engineering and IT teams in Scrum and Kanban in Azure DevOps and Microsoft Project.
- Shortened launch time from a month to under a week by building a ticketing and service management system and training and onboarding teams onto it.
- Migrated the enterprise DITA XML knowledge base to a new platform with Okta SSO for 10,000+ users across two siloed sites, live on schedule with adoption up 5x.
- Compressed project timelines from 25 days to 4 by deploying a QA validation standard the organization adopted.

Technical Program Manager, Global Product & Services Operations | **Meta** | Contract

May 2022 - January 2023

- Eliminated 90% of client escalations within 60 days by overhauling issue triage and case handling.
- Built the knowledge base and CRM widget enterprise support teams used inside the Meta CRM and Salesforce to ship features, launches, and fixes.
- Delivered 100% data integrity and zero downtime on an enterprise CMS migration by directing the migration plan, test evidence, and go-live for the technical publications library.

Technical Program Manager, Platform Delivery | **LexisNexis** | Contract
November 2021 - May 2022

- Rebaselined and launched a four-environment platform implementation across three owning teams, and the launch runbook became the template for a dozen subsequent releases.
- Rejected defective SQL from release by reviewing developer scripts in VS Code and validating API responses in Postman until every block passed QA.
- Accelerated release velocity across 4 concurrent development teams by directing Agile ceremonies and aligning workstreams on process and delivery milestones.

Founder & Principal Consultant | **Doc & Writer Consulting** | Self-employed
January 2020 - Present

Independent consultancy providing program delivery, knowledge systems, and process design for enterprise clients.

Bankers' Bank of the West (Oct 2020 to Apr 2021) // Stood up the IT knowledge base for a correspondent bank, with its protocols, training, and onboarding.
AIRBOX (Jul 2020 to Sep 2025) // Reduced client setup time 30% by standardizing UL and EPA compliance protocols.
Mozilla (Aug 2020) // Edited API and SDK documentation for MDN.
Idomoo (Jun to Oct 2021) // Standardized global engineering documentation using Docs as Code (Git, Markdown).

Technical Program Manager, Content Platforms | **Hunter Douglas** | Contract
November 2020 - August 2021

- Scaled a content platform from 3 pilot sites to thousands of partner sites by directing the enterprise XML migration to Adobe Experience Manager Guides across 12 product lines.
- Integrated an acquired company's portfolios, brands, and products into the PMO by building the governance model, decision charts, and process flows that met legal and compliance criteria.

Program Manager, Operations | **O-I** | Full-time
October 2019 - June 2020

- Enabled global rollout across 2 manufacturing facilities by spearheading flagship pilot program and establishing governance frameworks adopted as company standard.

Project Manager | **Faustel** | Contract
June 2018 - September 2019

- Delivered 80 customer projects across the full lifecycle, from design workshops with customer engineers through build, shipping, on-site commissioning, and post-delivery maintenance.

Lead Technical Writer | **Concentrix** | Full-time
October 2017 - May 2018

- Improved SLA compliance 30% for a major consumer electronics client by standardizing agent training protocols and setting department-wide quality benchmarks.
- Onboarded cohorts of 40 new hires through a six-week program of workshops, demos, practical exams, and job shadowing that produced site SMEs.

TECHNICAL SKILLS

Program Management: Agile, Scrum, Kanban, Waterfall, roadmaps, RAID, RACI, phase gates, business cases
Delivery Tooling: Jira, Confluence, Azure DevOps, Microsoft Project, Smartsheet, Salesforce, SharePoint
Analytics: SQL, Power BI, Power Query, Excel, Google Sheets, Postman
AI & Automation: LLM applications, Microsoft Copilot, Power Automate, Python

EDUCATION & CERTIFICATIONS

PMP: Project Management Institute | February 2026
Agile Project Management: Atlassian | September 2025
BA, Professional, Technical, Business & Scientific Writing: University of Wisconsin-Milwaukee
